DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6, 9-10, 13-14, 18, 21, 24, 27-31 and 33-42 are allowed.

The following is an examiner's statement of reasons for allowance: Independent claims 1,5,13 and 31, when considered as a whole, are allowable over the prior art of record.

Specifically, the prior art of Rekimoto teaches the limitation: "manually dragging digital display objects from one display surface to another", But the claims recite a different combination of limitation: *"plurality of display devices are in physical and visual proximity to each other... presenting the first content at the second display device, wherein a propagation order of the second content followed by the first content represents the sequence, wherein initiating the gesture simultaneously changes both the first display device and the second display device"*, that is not suggested or shown by Rekimoto.

Kataoka is introduced and teaches "using gestures to manually move digital objects around a display device", but the claims recite a different combination of limitation: *"plurality of display devices are in physical and visual proximity to each other... presenting the first content at the second display device, wherein a propagation order of the second content followed by the first content represents the sequence, wherein initiating the gesture simultaneously changes both the first display device and the*

second display device", that is not suggested or shown by Kataoka combined with Rekimoto.

The dependent claims further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable. Therefore the claims are allowed over the art because the claims differ in scope that is not seen or suggested by the prior art.
